

ABSTRACT

A METHOD OF PREVENTING PARTURIENT HYPOCALCEMIA IN ANIMALS AND  
COMPOSITIONS USED THEREIN

5

Method of preventing parturient hypocalcemia and milk fever (parturient paresis) in  
lactating animals comprising administering to the animal during the dry period a  
compound which reduces absorption of calcium from the drinking water and/or from  
the ration of said animal. The method is based on the powerful, natural calcium  
10 regulating mechanisms and is applicable under commercial farming conditions.
